PROFILE

I'm a **UI/UX Designer** with **2.5 years** of experience blending design thinking, visual precision, and photo editing to create interfaces that are both beautiful and highly usable. I've worked across multiple industries, designing complete digital products - from user-facing experiences to complex admin applications. My working process is a deep **user-first mindset**: I always think like a real user before I start designing. This helps me clearly understand user problems and deliver simple, practical, and future-ready design solutions.

PROJECTS

DKC – Designer Kids Club (E-commerce Clothing Platform) (Web & App) [🔗](#)

I designed a complete fashion-tech ecosystem where users can buy, sell, rent, and repair clothes. I created the user application and a full admin panel covering sellers, rentals, repairs, and platform operations. I also designed advanced features such as virtual try-on, digital/virtual wardrobe, and image-based search, focusing on intuitive navigation and scalable e-commerce UX.

Adani Saksham – Learning & Skill Development Platform (Web) [🔗](#)

I designed end-to-end experiences for learners, trainers, and admins on a large-scale education platform. My work included course catalogs, trainer dashboards, reporting modules, and course launch flows, improving onboarding efficiency and reducing manual setup through structured UX and design systems. [🔗](#)

Group Landmark – Automotive Dealer Platforms (Honda & Mercedes-Benz) (Web & App) [🔗](#)

I designed product detail pages and complete admin panels for Honda and Mercedes-Benz dealerships. My work included inventory management, booking workflows, service scheduling, and internal admin operations, while strictly adhering to brand guidelines and improving lead and dealer-side efficiency.

LeoStarts – Business Consulting & Services Platform (Web) [🔗](#)

I designed the full website experience for desktop and mobile, covering landing pages, service catalogs, and client onboarding flows. The focus was on trust-building, simplified service discovery, and a clean, responsive interface that clearly communicates diverse business offerings.

FoodBoss – Quick Commerce Platform (Web & App)

I designed a full-scale quick commerce platform combining food delivery and instant commerce into a single system. I created the user application along with role-based admin panels for vendors, sellers, writers, and platform admins, ensuring smooth operations, fast discovery, and scalable multi-panel UX across all stakeholders.

Aavak – Multi-Role Commerce Platform (In Development) (Web & App) [🔗](#)

I designed the complete UI/UX for a multi-role commerce platform, currently in development. My work included **mobile and desktop user applications** and **role-based admin panels** for super admin, vendors, and warehouse operations, with a focus on scalable workflows and smooth operational management.
